PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with experience building scalable web applications using React.js, Node.js, and FastAPI. Proficient in engineering RESTful APIs, automating data workflows with Python, and optimizing database performance. Passionate about delivering high-performance backend architectures and seamless user experiences.

TECHNICAL SKILLS

Frontend Technologies: HTML5, CSS3, JavaScript (ES6+), React.js, React Hooks

Backend & APIs: Node.js, Express.js, FastAPI, REST APIs, Context API, JWT

Data & Processing: Python, OpenCV, Image Processing, Data Analytics, Pandas

Databases: MySQL, MongoDB, Google BigQuery

Tools & Version Control: Git, GitHub, VS Code, Postman, NPM, Looker Studio, Power BI

PROFESSIONAL EXPERIENCE

Data Annotator (Data Analysis) | Samsung SEED Labs Nov 2024 - Present

- Analyzed and validated large AI/ML datasets, ensuring high data accuracy for model training and validation.
- Engineered automated **Python** scripts utilizing **OpenCV** to pre-process and validate datasets, accelerating the annotation and quality assurance workflow.
- Performed data validation and pattern analysis using SQL and Python, creating BigQuery and Power BI dashboards to monitor data quality.

Full Stack Developer Intern | Right Angle Solutions Feb 2024 - May 2024

- Architected and maintained 4+ scalable full-stack web applications using React.js, Node.js, Express.js, and MySQL.
- Implemented and optimized RESTful APIs, reducing data retrieval latency and improving reporting accuracy.

PROJECTS

IoT-Based Smart Monitoring System

- Developed a real-time data monitoring system utilizing a high-performance **FastAPI** backend to process incoming sensor data streams.
- Integrated **Python** scripts for accurate data collection and analysis, supporting real-time tracking of diverse physical and environmental parameters.

Micro Credit Web Application

- Designed a responsive React.js and MySQL web app for managing user authentication and small-scale financial transactions.
- Implemented secure REST APIs, JWT-based authentication, and robust input validation.

Music Player Web Application

- Built a full-stack music streaming platform using React.js, Node.js, Express.js, and MongoDB.
- Integrated Google Drive cloud storage for scalable audio file management and seamless streaming.

CERTIFICATIONS

- Full Stack Web Development Certification - Novitech Pvt. Ltd.
- Image Processing Course - IBM
- Python Complete Course - Udemy

EDUCATION

Bachelor of Engineering in Electronics and Communication Engineering

Graduated: 2024

Jai Shriram Engineering College | CGPA: 7.8
